

Expo 2017 - Astana

Theme : FUTURE ENERGY

The Expo theme “**Future Energy**” does not directly relate to ITPO’s usual trade promotion activities but more to energy sector where ITPO expertise or resources are not sufficient to set up an India Pavilion in a befitting manner. It would, therefore, be necessary to tie-up partnership and active involvement of relevant ministries, viz., M/o Power, M/o Renewable & Non renewable Energy, M/o Petroleum & Natural Gas, etc.

‘Future Energy’ as the main theme of Astana EXPO 2017 has been broken-down into the following three sub-themes:

- Reducing CO₂ emissions;
- Living Energy Efficiency; and
- Energy for all.

The title of the Exhibition Theme is the ‘Future Energy’ and the subtitle is ‘Solutions for Tackling Mankind’s Greatest Challenge’

Special Regulations No 1 of the Expo Authorities is having detailed definition on the Theme and means of its implementation by the Organisers & participants.

To develop theme pavilion at the India Pavilion of the Expo, involvement and contribution of concerned Ministries is solicited.

Chosen Sub Theme for India Section and additional information on the Theme and Special Requirements are to be defined by September 01, 2016 as per participation Contract.
